You put something better inside of me
You put something better inside of me

I could look out the window or stare at the wall
But really it didn't matter, no, I just didn't care at all
Could be sitting by the water counting every stone
'Cause nothing means nothing when you're empty and
on your own

But you put something better inside of me
You put something better inside of me
Makes me so much stronger
I'm amazed at the change in me

Well, I knew what I was doing, I was running away
Busy going nowhere, just wasting the time of day
Walking down the road, kicking up the stones
Nothing means nothing when you're empty and on your
own

But you put something better inside of me
You put something better inside of me
Makes me so much stronger
I'm amazed at the change in me
