let's make a deal
an understanding with the devil on my heel
that way i won't be tied to reservations i feel
let's shake on it
seal the moment
with more than just a kiss
cos there's been many times i've waited and waited for
this
you win some and you loose some
anyway you go
don't know
just choose one
even though it takes one kind to know one
you fool me again
you fool me again
let's sit a while so we can study the angle of your smile
but how to read you any guess is as good as mine
