

Daylights, The

"Goodbye, Goodnight"

Visit "[Goodbye, Goodnight](#)" on [MotoLyrics.com](#)

Life can get a bit out of hand
Treat you like a seed in sand
Leave you out to dry

The day can get so long
Seems like a thousand years
And we scrape and we fall
And we do it again do it again tomorrow

(Chorus)
Does anybody need someone
To be the one to come and rescue their heart
You know who you are

Crash into our hideaway
Where we pretend that we're fine
Everything is ok
But we're not here to live just to die in our pain

(Chorus)

Can you hear me?
Say the words and I'll be there
Hold you like a mothers prayer
Take the hurt, calm the fear
Make the bad things disappear
Keep your world from spinning round
To give you love you never found
To wash your feet, to lift you up
To dry your eyes

(Chorus)
Everybodys gotta take their chances
Everybodys gotta love someone
You know who you are
I don't think I'm going to hold you closer
Cuz I know you're beautiful
You know who you are
Can you hear me?
