Say goodbye to Summer  
She's leaving for a while  
I said it's getting cold out  
She barely forced a smile  
Like little children always know  
Sun goes down you better get home  
I never noticed it was too late  
Didn't want to leave didn't want to say  
Goodbye summer, goodbye summer

I heard your favorite song today  
the melody stuck in my head  
and I remember you never needed words to explain  
What we both knew we had  
You remember, 100 million people fast asleep  
Laying there thinking of you and me  
I can feel December closing in  
Why'd you have to leave? Why'd I have to say goodbye  
summer?  
Goodbye summer

We'll always have that summer now  
Feel it still sun on our skin  
and when it fades have no regrets  
I'll not forget, I'll not forget oh  
Goodbye summer  
laying there thinking about you and me  
Goodbye summer  
Why'd you have to go Why'd you have to leave  
Goodbye Summer  
Why'd you have to go I wanted you to stay  
Goodbye Summer
