There is no sense in being interested in a child, a
group or in a society
There is no sense if one does not see in them before
anything else
The life it's capacity to founded upon itself

There is no sense in being interested in an ill person
Or unwell a society if one cannot believe their
readiness
And the capacity for proper recovery

There is no sense in being interested in an ill person
Or unwell a society if one cannot believe their
readiness
And the capacity for proper recovery
