Song by Creeper Lagoon

pour yourself a strong drink she said thats all i needed
have a seat with a cold trick that spun for days with out
you
turn around theres a new spring that lifts the weight of
wanting empty ships will slow sink themselves in blue
and
chasing follow through with a strong swing im told saw
stars forever walk around with a slow step behind those
streets gone nowhere take a bow you can fly far with all
that luck your saving empty ships will slow sink
themselves in blue and chasing put it down your all
done
for now lets walk in wonder take a dive in a clear
thought
slow down say help im shaking change your name to a
lost cause tuned out for years left sailing empty ships
will
slow sink themselves in blue and chasing
