Pull up to the club she dancing on me
I don't really know what she doing to me
But I really know how she really want me
I'm like girl you dancing on me

Dancing on me
I don't know about you but she dancing on me
Go girl [x7]

Cop that bottle pop that bottle shake that bottle
To pour it on a model
You follow
Now do your little dance like a genie in a bottle
Shawty ain't letting me leave,
When I move she move she ain't letting me breath
Shawty ain't letting me leave,
When I move she move she ain't letting me breath

Pull up to the club she dancing on me
I don't really know what she doing to me
But I really know how she really want me
I'm like girl you dancing on me

Dancing on me [x6]
I don't know about you but she dancing on me
Go girl[x7]

If I was a crown you'd be serving it down
Her brains were the same she said I'm all on her mind
Watching her every move stalking her body parts
The way I might attack her she might need a body
guard
The jewels had her like?
Champagne to us is nothing but mouth wash
You get it from your momma
Shake what she gave ya
Drop it like it's hot, I could'nttake this behavior

Pull up to the club and the lambo was looking sweet
Don't know about you but her hands was on me
Then she started feeling that the handle was on me

But she wanted to lick the rapper like candy was on me

Dancing on me
I don't know about you but she dancing on me
Go girl

[Juelz Santana:]
Grind on me
Wind on me
Then turn around and put your behind on me
Now grind on me
Now grind on me
Now lemme take you home you can ride on me
See ladies love me
Girls they adore me
Haters hate me but they can't avoid me
She wanna get kinky
Keys all on me
I wanna get freaky, me so horny
So I whispered in her ear like what is we gonna do
She looked at her friend and I'm like she can come too
All three of us should get one room and do things we
like to do

Dancing on me
I don't know about you but she dancing on me
Go girl

Shake your little diggy dong dong de dong dong [?]
Show me what your momma gave ya
Show me what your momma gave ya
