Complications, complication going down  
Complication in your lifetime  
Complication all around, once more to

Complications, complications in the wind  
Complication where you're bound for  
Complications we've been

You've been trin' to do your job, tryin' to save a dollar  
Tryin' to do the best that you can  
Tryin' to pay the rent and keep the lights shining  
Tryin' to be a simple kind of man

But your problem is complications  
Complications you to stay  
Complications every night now  
Complications everyday

Tony planned a trip to Florida, gonna find this in the  
sun  
New York City, went abroad and down  
He was headed to the airport when the snow began to  
fall  
It was days before he finally left the ground

'Cause the complications  
Complications in the air  
Complications in the forecast now  
Complication everywhere

Judy finally got a vehicle, the auto of her dreams  
Flashy supersonic road machine  
And so she pulled into the pubs, but Ronnie bring her  
down to find out  
Now she can't afford to take a gasoline

Because complications, complication back again  
Complications in your lifetime Judy  
Complication's still your friend

You'll be walking down the street, meet up with a friend

Young and seem to be a little mad at you  
He takes you with a punch and leaves you on the  
ground there  
Trying to figure it out, don't have a clue

You just got complications  
Complications knocks you down  
Complications on the sidewalk bank  
Complications on the ground, go ahead

Just a complication, complications in the air  
Complication in the forecast  
Complication everywhere, everywhere

Just complication, baby  
Complication all the time  
Complication in your footsteps  
Complications in your mind
