Hey, hey, what planet are we on?
Everything seems wrong
Hey, hey, tired of trying to survive
Living half alive

I'm ready to ride this rocket, baby, come with me
To the other side of heaven, our own galaxy
A million miles from anywhere
All we need is out of here
Let's go, put some stardust in our pocket
Ready to ride this rocket

Someday wrong will turn to right
We will win this fight
But today, all I wanna do
Is just get away with you

I'm ready to ride this rocket, baby
Come with me to the other side of heaven, our own
galaxy
A million miles from anywhere
All we need is out of here
Let's go, put some stardust in our pocket
Ready to ride this rocket

Turbo on this baby blue Corvette
Red wine, a blanket, are you set?
Oh, there ain't no way to stop it
Are you ready to ride this rocket?

Are you ready to ride this rocket, baby?
Come with me to the other side of heaven, our own
galaxy
I'm choking in this atmosphere
All we need is out of here
Let's go, put some stardust in our pocket
Are you ready to ride this rocket?
