Boys we're living in a brave new world
Let me tell you what I've learned about girls
In this age of high tech and state of the art
When it comes to love you've still gotta talk to her heart

She can have a college degree
MBA or a Ph.D.
She can be strong, she can be smart
But when it comes to love, you've still got to talk to her
heart

You gotta be honest, you gotta be real
You gotta tell her how you really do feel
Don't talk about fishin', don't talk about cars
Talk about the moon and talk about the stars
Tell her she's beautiful just talk to her heart

You gotta be honest, you gotta be real
You gotta tell her how you really do feel
Don't talk about fishin' don't talk about cars
Talk about the moon and talk about the stars
Tell her she's beautiful just talk to her heart

Well there's been a lot of changes since time began
But nothing's changed between a woman and a man
It's how things were, it's how things are
When it comes to love you've still got to talk to her
heart
Yeah, when it comes to love you've still got to talk to
her heart
