Before you break my, break my heart
Before you break my, break my heart
Before you break my, break my heart
Before you break my, break my heart
Now I've been a fool
Unlucky in love
Just longing to find
Someone I can trust
So please understand
Why I have my doubts
Girl you need to know
Just what I'm about
When you're my girl
I'll give you the world
Buy you the finer things
Like diamonds and pearls
Keys to my home
I'll give you my all
But baby there's just one thing you should know
I don't ask for much when you're with me
Girl just promise you'll stay by my side
â€˜Cause I don't give no second chances
All I'm asking is baby think twice
Before you break my, break my heart
Before you break my, break my heart
Before you break my, break my heart
Before you break my, break my heart
They say I'm the one
But words ain't enough
You gotta show me
Girl, what's in your heart
â€˜Cause I had enough
On messing around
So baby please, just don't let me down
When you're my girl
I'll give you the world
Buy you the finer things
Like diamonds and pearls
Keys to my home
I'll give you my all
But baby there's just one thing you should know
I don't ask for much when you're with me (no, I

don't let me down
Girl just promise you'll stay by my side (stay by my side)
Cause I don't give no second chances
All I'm asking is baby think twice (baby think twice)
Before you break my, break my heart
Before you break my, break my heart
(Baby think twice) Before you break my, break my heart
Before you break my, break my heart
Just remember to love me carefully
Cause it ain't worth risk losing everything
And forever is just what we should be girl
Just don't let me down
I don't ask for much when you're with me (I don't ask for much)
Girl just promise you'll stay by my side (stay by my side)
Cause I don't give no second chances (I don't let me down)
All I'm asking is baby think twice (baby think twice)
Before you break my, break my heart (baby, my heart)
Before you break my, break my heart
Before you break my, break my heart
Before you break my, break my heart
