Every day I watch him treat you bad, but I don't have a
clue
And it's killing me to know that he don't love you like I
do
Late night conversations on the phone telling me you
can't let go
And I tell myself, I bite my tongue that you should know
that

Chorus:

If I had your love I would never break your heart
Your love
I would never let you go
Your love
Every day, every night, treating you right
If I had your love
I would never jeopardize
Your love
I would never compromise
Your love
Every day, every night, treating you right
If I had your love!

This seems like every time I ask you
Say that you're OK
But with every passing day I see the smile fade from
your face
There's a million reasons you should leave
But you choose to stick around
And I try my best to let it go, but you should know that

Chorus:

If I had your love I would never break your heart
Your love
I would never let you go
Your love
Every day, every night, treating you right
If I had your love
I would never jeopardize
Your love
I would never compromise

Your love
Every day, every night, treating you right
If I had your love!

Girl, the grass is so much greener on the other side
Girl, you need someone to be there through the lonely
nights
I don't wanna be a hater, but you should know
Baby you deserve much better!

Chorus:
If I had your love I would never break your heart
Your love
I would never let you go
Your love
Every day, every night, treating you right
If I had your love
I would never jeopardize
Your love
I would never compromise
Your love
Every day, every night, treating you right
If I had your love!
