My waking thoughts to thee are ever turning
My heart is always filled with love for you
Jeg elsker dig som ingen her paa jorden
Jeg elsker dig, Jeg elsker dig, Jeg elsker dig
I tid og evighed! Jeg elsker dig I tid og evighed

No other love could fill my heart completely
No other love I need to find
Jeg elsker dig
Jeg elsker dig
My love for you will never go away
I see forever when I look at you
Inside are feelings so completely new
With every move I make you are a part of me

When all is said and done you are the one
You are my morning and my midnight sun
There's nothing more to say
Jeg elsker dig
I'll love but thee
Through all eternity

Jeg elsker dig som ingen her paa jorden
Jeg elsker dig, Jeg elsker dig, Jeg elsker dig
I see forever when I look at you
Inside are feelings so completely new
With every move I make you are a part of me

When all is said and done you are the one
You are my morning and my midnight sun
There's nothing more to say
Jeg elsker dig, I'll love but thee
Through all eternity
