One touch is all it takes
And time just drifts away
You are the reason why
I'm so alive each day

With every single touch
You make me feel so much
Like no one else before
My senses re-awake
One touch is all it takes
To keep me coming back for more

How did you know
You'd set me free
Your hands erase the memories
You're every dream I ever knew
And I am so in love with you

Hold me forever
I won't let go
You are every woman I need to know

With every single touch you make me feel so much
Like no one else before
My senses re-awake, one touch is all it takes to keep
me coming back for
More
One touch is all it takes
One touch and I'm forever yours
One touch and I'm forever yours
