"Generation Genocide"

Visit "[Generation Genocide](#)" on MotoLyrics.com

Funny how someone we've never met
Can have such a great impact
How someone we've never known
We adopt and fight for as our own
When our compassion dangles on a rope
The brightest light ahead is hope

And our morals are down the drain
And we wonder why there so much pain
And we act like they don't matter
So we make death the deciding factor
Generation Genocide
Were committing suicide
Look me in my eyes
And tell me everything is fine

To step out side these walls and tears
We built and cried to house our fears
We think these choices are just and fair
But we've created our darkest nightmare
Politics, power, profit, and pride
Four things to guide us to our demise

And our morals are down the drain
And we wonder why there so much pain
And we act like they don't matter
So we make death the deciding factor
Generation Genocide
Were committing suicide
Look me in my eyes
And tell me everything is fine

Proverbs 6:17 (Things That God Hates)
Hands that kill the innocent

Proverbs 24:11
Rescue those who are unjustly sentenced to death,
don't stand back and let them die.
