

December Star "October Essence"

Visit "[October Essence](#)" on MotoLyrics.com

Its gotten so much colder since you left
The leaves have all died and fell to the ground
I think about the times that we use to have
All these stupid memories you cast
And does it hurt when you think about me
Sometimes I sit and wonder how this could be (Me
without youâ€¦!..)

These nights can't get and colder
You cried on my shoulder
Made me feel like I was the one
Then you left me alone tonight, these lonely October
nights
Just wont feel right (me without youâ€¦!..)

I can see your breath under the street light
As we walk by hand in hand
What happened to the days of happiness
Your feelings change just as fast as the season
What happened to your love that you once had
It must of died and fell to the ground

These nights can't get and colder
You cried on my shoulder
Made me feel like I was the one
Then you left me alone tonight, these lonely October
nights
Just wont feel right (me without youâ€¦!..) X2
