In June we met between silent basses  
And many many strange Faces  
But we skipped them all aside  
And I began to obey your big brown eyes  
But it was too perfect to stay for long  
And soon I began to know what you're on  
You want to form me  
Want to norm me  
Want to make me all that i can't be  
Oh don't make me stay  
I won't fool myself no way no way  
Oh i better stay alone  
And find my way back home  
But somehow I found i was so wrong  
To send you off and out of my life  
So I ran threw the night searching for you  
Searching for the girl i never knew  
At the theater we found but nothings been  
As it was that night  
And then she looked

Now and forever Right threw me  
As if I as if I  
Wasn't there  
She said  
Oh don't make me stay  
I won't fool myself no way no way  
Oh i better stay alone  
And find my way back home  
Oh I guess I'm threw with you  
The fire is out
