She was on her own tonight
She knew the fools and she played them right
Maybe that was something I thought she saw in me
If you were to ask me why
For my amusement and to pass the time
Maybe she will cast a line into the big Black Sea

Now she said I, I could be lonely
I could be lonely in your arms
I know that I, I could be lonely
I could be lonely in your arms

Baby it's a long way down
Maybe on the wrong way round
And every damaged tortured soul shall let it be

Then she said I, I could be lonely
I could be lonely in your arms
I know that I, I could be lonely
I could be lonely in your arms

Something to do hang around walk you home
Something I thought about
Something to do hang around walk you home
Something I thought about

Then she said I, I could be lonely
I could be lonely in your arms
Another night I could be lonely
I could be lonely in your arms

Something to do hang around walk you home
Something I thought about
Something to do hang around walk you home
Something I thought about
Something to do hang around walk you home
Something I thought about
Something to do hang around walk you home
Something I thought about
