"All Together Now"

Visit "[All Together Now](#)" on MotoLyrics.com

All together now everybody drink (everybody drink)
All together now everybody think (everybody think)
Think of all those sweet words that turned out to be just
lies
All together now everybody cry and cry cry all together
now everybody cry

I once dealt in laughter wearing love's happy face
But now I'm wearin' out my heartaches in this crowded
place
I lost her love but I'm still clinging to her memory
But I guess there's lots of people here like me

All together now everybody drink...
[guitar]
Come on friends let's gather round and sing some real
sad songs
Let's fill up our cups of grape and have a sing along
Everybody join in make the rafters ring with pain
When the grape runs low we'll fill our cups again

All together now...
All together now...
