I found myself wandering aimlessly last night  
I still can't believe that it ended in a fight  
Now it's eight o'clock in the morning, you act like  
nothing's wrong  
Things don't change overnight  
Now, you and me, we've spent a lifetime together,  
baby, make up your mind  
Chorus:  
I can't live without love, I can't live without love  
Listen to your heart, is it tearing you apart  
Can't live without love, you can't live without love  
Tell me what you're thinking of, I can't live without your  
love  
It's just another cold night alone with you  
We've got a long, long, long, long way to go now  
And oh, you gotta know, all the pain you put me  
through baby  
It's not easy letting go  
I've given you both worlds, so now you make your  
choice  
Oh, I need to hear your voice  
chorus  
Without your love, yeah yeah  
(Solo)  
I can't live without love, can't live without your love  
Listen to your heart, is it tearing you apart  
Can't live without love, can't live without your love  
Tell it through my heart, then forever we're apart  
Can't live without love, can't live without your love  
Can't live without love, without your love
