Enchanted with powers given to them
Something that they had since the beginning of time
Inherited powers
Mother of nature, they are her children
With the quest to take care of our beautiful world
The nature
Magic elements
Giving them their strength
Earth and fire, water, wind
Kind and helpful is what they are
With no questions they help everyone
That's in need all they shall help
But ignoring their rules
And breaking your promise
Will cause them to build up their anger inside
You shall feel their wrath
Magic elements
Giving them their strength
Earth and fire, water, wind
So live in peace with them
And feel the magic surrounding you
Mighty elements
Guide you through your life
Signs from the goddess, we cannot see
The lack of knowledge and lack of faith
Have made us blind
But if you search for the old ways
And learn the traditions
Soon you can hear them speaking the words
And learn their secrets
Magic elements
Giving them their strength
Earth and fire, water, wind
So live in peace with them
And feel the magic surrounding you
Mighty elements
Guide you through your life
