We saw you both at first in our Kindegarden class

We saw you both together and we said they got class

Now 7 years later and you still don't realize

I am everything you want

I am everything you need

I am everything in side you that you wish you could be

I saw all the right things at exactly the right time

But I mean jack to you

And I don't know why

Cause I've been,

Wishing for you on a shooting star,

Dreaming of where you are,

Do I every cross your mind

In the warm summertime,

Let's get married in the City of Angels

You and your twin brother really like cable

You don't know what you mean to me

We fell for the boys that are on Team B
