C'mon baby get the lighter

We're gonna start the fire

The army of words is in me

Silent the soldier weeps

Lying here back to back

Waiting for you to be react

Sometimes all I need is a good push

Roll over and whisper some goodness

Go on baby you be the hero

Now can we go back to zero

[Chorus:]

Go on and get the lighter

We're gonna need some fire

Let's get a little higher

The battlefield is tired

And why all that?

Go on baby and get the lighter

We're gonna start the fire

Just come here and cuddle up

I feel a little rough

I missed you in my sleep

Are you still mad at me?

The moon must have mended my bad mood

Come kiss me the way you're meant to

Last night I was just playing

Let's put it all away and

[Repeat chorus]

Go on baby and get the lighter

We're gonna start the fire

Go on baby and get the lighter

We're gonna start the fire

Climb in, love with me

Climb in and love me

Go on now baby you get it

Had quite a heavy night

So girl look it all up and bright

The most stubborn girl around

You really know how to bring me down

One more famous night to remember

Let's laugh at my silly temper

Now let's spend the morning sweetly

Get over here and complete me

[Repeat chorus]

Go on now baby you get it
