Burning brightly like the pyre
Oh, yeah the funeral fire
Eternal flames that never die
Arcing out towards the hazy sky

You can see it for miles
Mourn the loss and wear no smile
Oh burning like the blazing sun
You'll be the devil's bright beacon

Feel the flames, rising higher
See the smoke blowing skyward
Burning the body of the beloved one
We'll make lover under that smoke-choked sun

You can see it for miles
Mourn the loss and wear no smile
Oh burning like the blazing sun
You'll be the devil's bright beacon

Love you in death
I love you in death
I love the way you burn baby
I love you in death
Love you in death
Love you to death
I love the way you burn woah
I love you in death

You can see it for miles
Mourn the loss and wear no smile
Oh burning like the blazing sun
You'll be the devil's bright beacon

Love you in death
I love you in death
I love the way you burn baby
I love you in death
