### "Don't Bring Harry"

Visit "[Don't Bring Harry](#)" on MotoLyrics.com

Harry and me we live in a dream  
With a friend like him I don't need enemies

I don't know where morning is  
It might not come today  
That's the trouble when harry's around  
He forces me to play

I should have refused to meet this midnight cheat  
He likes to prey on my mind with his own special treat

I don't know when morning comes,  
It might not come today.  
Harry likes to play all night  
I'll do what harry says

Don't bring harry I don't need him around  
Don't bring harry I don't need him around

Ah you've met harry - I can see by your eyes  
If once there was life there, now there's compromise

Harry is a beast of luxury  
He just wants my body and soul - leaves the bones  
behind

Ah you've met harry - I can see by your eyes  
If once there was action - Now there is no life

Don't bring harry I don't need him around  
Don't bring harry I don't need him around
