

## Stranglers

### "Genetix"

Visit "[Genetix](#)" on [MotoLyrics.com](http://MotoLyrics.com)

See the little nuclei  
Bursting full of information  
There's a need to regulate  
Bring it down to cells and plasma

Tell you what they're gonna do  
Started doing it already  
Got to find something new  
Looking for it in genetix

Found a new game to play  
Think it's impossible to lose  
Messing round at playing God  
Easy way to play genetix

Gene regulation

"The first law of Segregation  
States that any gamete male  
Or female can carry the  
Determinant gene of only one  
Pair of alternative characteristics.  
The second law of free assortment  
States that in a cross involving  
One pair of alternative characteristics,  
The characteristics will segregate  
In the second filial generation,  
In the relative proportions of  
9, 3, 3, 1"
