"With Love"

Visit "[With Love](#)" on MotoLyrics.com

For every heart in this world
For every soul, there's only one word
I have a dream, for anyone's sin
It's just a thought, that i want to sing

With love
With love and happiness
You 'll find the tenderness
You touch the stars above

With love
With love and happiness
You fight the loneliness
You change the world with love

For everyone in the rain
For every child who lives in the pain
There is one cure, known as a thrill
It's like a secret, that you can feel

Stile agapi makria
Ke stis gis kathe gonia
Me agapi stin kardia su
Tha petas psila

With love
With love and happiness
You 'll find the tenderness
You touch the stars above

With love
With love and happiness
You fight the loneliness
You change the world with love
