Elements

Wind, fire, water, earth

Elements

Fear, anger, sorrow, joy

Pools of sounds fill my mind

A universe of shapes

Kaleidoscope of colors

Stargardens blossom in their solitude

Spiral architecture

Here I'm standing

Here I'm wondering

Curiosity, thirst for knowledge

Eye for an eye and the whole world will be blind

Oceans of madness drowning the hope of mankind

What kind of man kills because of ideology?

What kind of God justifies violence?

I am begging for comprehension

While aggression tears the world apart

Elements

Wind, fire, water, earth, elements

(We are star children)

Elements

Fear, anger, sorrow, joy, elements

(That's what we are made of)

Elements

Wind, fire, water, earth, elements

(That's what life's made of)

Elements

Fear, anger, sorrow, joy, elements

(That's what I'm made of)

Wind, bringer of fright

Fire, protector

Water, cleanse my soul

Earth, be my guide

And in the darkest night  
I won't give up the fight  
I won't be losing hope  
I hold on to what is true
