Strawbs - Inside Your Hell Tonight

Storms are breaking in California  
From the East Coast a twister comes  
She lies waiting for her lovers  
A crumpled rag doll that's cast away  
Then they call her on the phone  
Telling lies that she can see through  
So they'll live inside their hell tonight  
Knowing they were saving their own skins

Signing up for high adventure  
Young and innocent so alive  
Mules and asses held the high ground  
While the lions stood like sitting ducks  
Then they drove them through the fire  
With a cry of "we know better"  
So they'll live inside their hell tonight  
Knowing they were saving their own skins

Sailing oceans to a new life  
Friends and family are tied as one  
Captain's table rocks with laughter  
Glasses raised to a job well done  
And the market place is waiting  
For the souls that can't be bought  
So they'll burn inside their hell tonight  
Knowing they were shaming mankind

Like a dead bird in a green field  
Still and peaceful the body lay  
I don't need to witness something  
To confirm all my deepest fears  
But I climb inside my car  
And I stop the help arriving  
So I'll live inside my hell tonight  
Knowing I was only gloating
