"Now"

Visit "[Now](#)" on MotoLyrics.com

Blue skies, sunshine all day
Blue skies, sunshine on my face
I know you know what I'm thinking about you
And I think it's time we do this right
Just give me one good chance to prove that I can be
Everything you ever dreamed of

I'm not gonna wait no more
It's been too long
So let's begin

You stole my heart away
You never even said a thing
And I want you now, now, now, now, now
I want you right now

Moon light, shining in the night
Moon light, shining in your eyes
As we danced and I held you close to me
I could feel your heartbeat, next to mine
So if you feel the way I feel, let's take off and fly

I'm not gonna wait no more,
It's been too long
So let's begin

You stole my heart away
You never even said a thing
And I want you now, now, now, now, now
I want you right now
