It's only you  
you do this to me  
It's only me  
I'm easily led  
You take control, but I follow instead

I hope you don't run  
I need you to stay  
I hope you don't run  
I need you to stay

It's only us  
we do what we please  
We wonder why it hurts us so much  
The pain is all that we need  
It was just an idea  
Now everything has turned to black

I hope you don't run  
I need you to stay  
I hope you don't run  
I need you to stay

It's only you  
It's only me  
It's always been us  
It's always been us
