They say
You got me acting like fool
I know I know I just got to play it cool
I dream
About you every night
Yes I see I see I can finally see the light

Just take a chance Come with me
Don't think twice Just let it be

This is New
This you and me
It's real real real
This is not a dream
You can close your eyes and count to 3 you can open
them up there I'll be
You can do this time and time again over and over I'll
be there in the end
I'll be there in the end

They say
I got to take it slow
I know I know I feel it yearning in my soul
I pray
Each and every night
That you'll see you'll see that we can make it right

The way you take a hold of me
You're in my head it's plain to see

This is New
This you and me
It's real real real
This is not a dream
You can close your eyes and count to 3 you can open
them up there
I'll be
You can do this time and time again over and over I'll
be there in the end
I'll be there in the end

Just take my hand come with me
Don't think twice just set it free

This is New
This you and me
It's real real real
This is not a dream
You can close your eyes and count to 3 you can open
them up there
I'll be
You can do this time and time again over and over I'll
be there
You can close your eyes and count to 3 you can open
them up there
I'll be
You can do this time and time again over and over I'll
be there in the end
I'll be there in the end
I'll be there in the end
I'll be there in the end
I'll be there in the end
