Don't follow and burn the future believing
Teachings which defend a past conveyed to deceive
us,
To elevate a ruling class

We dream with all the love that you threw away
We dream truthseeking in the movement we stay
We dream in love with this resistance we play
We dream when we go and we dream when we say...

So far carry it on (on) so far carry it over
We dream now listen to the voice of the land
We dream defying all the killing commands
We give our restlessness to fight for the truth
We give healing from the fount of youth

Our own truth
Our own truth
Our own truth
Our own truth!
