### "Abandon Confusion"

Times come, you hid, feeling bad, what you did  
Somebody warns you to slip away, what to do?  
Take away all you got, think about what you're not  
I would love just to have one more chance  
I may appear a certain way  
I may not do everything you say  
I may not be the chosen one  
But you'll learn to live with what I've become  
Another chance only seems fair  
but if you can't I won't care  
Another day to run away from everything I've done is  
fine with me  
You feel this way, how about that  
Yesterday all you had disappeared into thin air  
You're not here: you're not there  
Take a look at yourself today  
Focus in on all things you say  
Seek the answers you need to know  
Realize it's so far to go I could say just to run  
Not to face all you've done  
Don't be the last one to hate everything  
I may appear a certain way  
I may not do everything you say  
I may not be the chosen one  
But you'll learn to live with what I've become  
Another chance only seems fair  
But if you can't I won't care  
Another day to run away from everything I've done  
Take a look at yourself today  
Focus in on all things you say  
Seek the answers you need to know
