### "Scream"

Isn't it clear  
Im here  
Dont cry  
My deer  
No more lows, just highs  
No ghosts tonight  
Now you know what it is that makes me sane  
Just little things only you can bring, (just little things)

Scream scream  
Louder I cant here what you say  
I see the candles in your eyes slowly fading away  
The photographs in your memories are stuck in my  
mind  
So long, so long  
Its time I leave you behind

So my love wont you try put a pretty face  
I'll keep my hands to myself and show some social  
grace  
I watch the clocks slowly ticking ticking away  
As I sit and hang on every word you ever say

Dont leave  
In the middle  
Try and breathe  
Just a little  
You can crash on the couch  
Close your eyes and your mouth

Now you know what it that makes me shake (Now you  
know what it that makes me shake)  
Its just little things only you can change (take?)

Scream scream  
Louder I cant here what you say  
I see the candle in your eyes slowly fading away  
The photographs in your memories are stuck in my  
mind  
So long, so long

Its time I leave you behind

So my love watch me try put a pretty face  
Keep my hands to myself and show some social grace  
I watch the clocks slowly ticking ticking ticking away  
As I sit and hang on every word you every say

But you're not saying anything  
And I dont need this now

Sometimes I wonder if I'll ever be the same again  
And I dont need this now  
Couse you're not saying anything  
And I dont need this now

Scream scream  
Louder I cant here what you say  
I see the candle in your eyes slowly fading away  
Photographs in your memories are stuck in my mind  
Its time I leave you behind

So my love watch me try put a pretty face  
I'll keep my hands to myself and show some social  
grace  
I watch the clocks slowly ticking ticking ticking away

Scream scream  
Louder I cant here what you say  
I see the candle in your eyes slowly fading away  
Photographs in your memories are stuck in my mind  
So long so long  
Its time I leave you behind

So my love watch me try put a pretty face  
I'll keep my hands to myself and show some social  
grace  
I watch the clocks slowly ticking ticking ticking away  
As I sit and hang on every word you every say
