And here I am, and here I'll stay  
I will be your shelter  
A shelter for your heart  
I will be a harbor when the world is cold and dark

I will stand beside you  
Through this whole life long  
To love you and to give you  
Shelter from the storm  
You are the love, love of my life

'Til the stars in heaven  
Fall down from the sky  
'Til the silent waters  
And the rivers all run dry

I will stand beside you  
Through this whole life long  
To love you and to be your  
Shelter from the storm
