

Stygma IV "Big Heat"

Visit "[Big Heat](#)" on MotoLyrics.com

We stand here proud and strong
On our way to the top
But we don't stand alone
'cause there's you and your support

It's fire and ice it's your only request
It's hot and it's burning but you're screaming for more
We bring it to you - we heat you up
Our intentions are clear and that's why we rock

In the big heat
Now everybody will rock in the big heat
Here we go and there we rock in the big heat
And all of you will rock in the big heat

We're doin' the best for you
And I can see we make it right
We all - can make it - if we want it
And we all will be stars tonight

It's fire and ice it's your only request
It's hot and it's burning but you're screaming for more
We bring it to you - we heat you up
Our intentions are clear and that's why we rock

In the big heat
Now everybody will rock in the big heat
Here we go and there we rock in the big heat
And all of you will rock in the big heat
