

Stygma IV "Turn Away"

Visit "[Turn Away](#)" on MotoLyrics.com

I - don't need your lies
'cause I - I can realize
All that you talk is one step back that you walk
You're burning dreams and you're stealing lives
Then you turn your head and walk away

You - you say it's alright
And you - say we have to fight - fight - fight
Cry after cry - I'm not apathetic and deaf
Where is your love and human tenderness
How can you ignore the signs of time

Why did you turn away
Why did you fade in the light
Why did you turn away
And bring back the night
Don't bring back

Why did you turn away
To play out power and might
Why did you turn away
And bring back the night
