There goes my first

There goes my first love,
with the guy i used to call my friend,
there's a love i thought would never end,
and i can't forget her,
my heart is breaking,
when i see her holding hands with him,
care to think of how it might have been,
she's still my first love

My first love is still around,
she never left this part of town,
now i see her most everyday but she don't look my way

There goes my first love,
with the guy i used to call my friend,
there's a love i thought would never end,
and i can't forget her,
my heart is breaking,
when i see her holding hands with him,
care to think of how it might have been,
she's still my first love

She loved me,
but not for long i wish i knew where i went wrong,
now everyday those pretty feet come walking on down
the street

There goes my first love,
with the guy i used to call my friend,
there's a love i thought would never end,
and i can't forget her,
my heart is breaking,
when i see her holding hands with him,
care to think of how it might have been,
she's still my first love

X2 to fade.
