A ray of light  
Star shines down  
Burning bright without a sound  
Queen of angels  
Take your crown and shine on  
Fly so high don't ever come down  
Shine on  
And every moment slips away  
Doing my best just to keep away  
An innocence lost  
Queen of sound  
In the cold morning frost  
We lay you gently down

**\*\*guitar solo\*\***

And all the things you wished you said  
Echoing inside your head  
I cannot live I cannot die  
Nothing left to do but try  
Falling underneath your spell  
Lift you out of your own hell  
Numb yourself now from the pain  
Wandering out in the rain  
Fly so high  
Don't ever come down  
Queen of angels  
Take your crown  
An innocence lost  
Queen of sound  
In the cold morning frost  
We lay you gently down
