You can't stop her walking in the rain  
But you might want to see that face someday  
You can't keep her from her little world  
But you might want her someday for your girl

Keep your head and stop it spinnin' round  
Keep your eyes wide open and you'll see her  
Alone at night, you count the stars above  
All alone at night you're prayin' for her love

You can love her  
You can love her  
You can love her  
You can love her...

You can't take everywhere she goes  
'Cause the worlds too complicated and you know that  
You can't help the things she's learned in school  
How she walks and who she knows, 'cause it's too late

You can't stop the tears she's saved for years  
You can hold her, you can make her understand  
Just last night you saw her as an angel  
Just last night she saw you as a man

You can love her  
You can love her  
You can love her  
You can love her....

When I walked alone last night  
I... knew all about the story  
I remember hearing you say  
"She's the one yeah, she's the only one  
For me... for me... for me... for me...."
