There's a quarter of a man in the market with a quarter  
of a car so it's easy to park it.  
He gets to the counter he pays what he can but he only  
pays a quarter.  
He's a quarter of a man.

Now this quarter of a man he got fired, the next damn  
day he got hired.  
The only thing wrong with this plan is he only makes a  
quarter.  
He's a quarter of man.

Every day he's on the street, too few quarters to live or  
to eat.  
He's so little the people all stare but he only pays a  
quarter fare.

Now this quarter of a man's on vacation but he still gets  
his ration.  
He gets to the market he saves what he can but he only  
saves a quarter.  
He's a quarter of a man.

Every day he's on the streets too few quarters to live or  
to eat.  
He's so little the people all to stare but he only pays a  
quarter fare.  
Now.

There's a quarter of a man in the market with a quarter  
of a car so it's easy to park it.  
He gets to the market he saves what he can but he only  
saves a quarter.  
He's a quarter of a man.
