[Angel]

Baby lets ride out, get lost till we can't see signs that's  
heading to London no more  
I'm getting so tired  
It's like all the hates and chit chats getting me fired (up  
more)

[Bridge]

Cause I don't wanna put up no longer  
I'm building up my future  
If I stay it can get crazy tonight  
Don't wanna take no wrong roads  
And end up sitting behind those four walls  
So if I stay it can get crazy tonight

[Chorus]

I don't wanna be here for another minuet  
Baby lets get up and out of here  
See I need space I need to breathe for a minuet  
Baby lets get up and out of here  
Out of here baby out of here [x4]

[Sneakbo]

I need a break I need a long long holiday  
Kicking out piffing on my bitch with some rozay  
No feds and no beef I'm lowkey  
Chilling in the sun I think I met my new wifey  
Spicy pretty hot mama yeah she fine  
When we're in the dark she be glowing like a light  
She smokes I guess we're both hypes  
I'm the galdem sugar I make them go wild (they go  
nuts)  
I'm on a holiday walking in my flip flops  
Everybody knows me cause I made another it drop  
I'm ghost mode you can catch me on a tv  
Come to my shows if you really wanna see me  
Hard times now my money's stacking up  
Plus the whips that I drive they're sounding like trucks  
So no trapping and no gang banging  
Right now I'm fucking chicks  
Pushing whips and rapping

[Chorus]

I don't wanna be here for another minuet  
Baby lets get up and out of here  
See I need space I need to breathe for a minuet  
Now Baby lets get up and out of here  
Out of here baby out of here [x4]

[Angel]

Baby lets ride out  
No clutch got my foot right down ain't watching no  
camera's today  
So girl don't look back and wait  
Cause you won't miss them when finding a new place  
to stay

[Bridge]

Cause I don't wanna put up no longer  
I'm building up my future  
If I stay it can get crazy tonight  
Don't wanna take no wrong roads  
And end up sitting behind those four walls  
So if i stay it can get crazy tonight

[Chorus]

I don't wanna be here for another minuet  
Baby lets get up and out of here  
See I need space I need to breathe for a minuet  
So baby lets get up and out of here  
Out of here baby out of here [x4]
