Hey, you know that things can't stay the same  
Hey, don't be afraid to make the change  
Hey, you know that things can't stay the same  
Hey, don't be afraid to make the change

Everyone's telling you you've gotta stand tall  
Just stick to what you know and you know you'll never  
fall  
I guess that I can say did not know what they're saying  
Have no fear move on and stop delaying

Hey, you know that things can't stay the same  
Hey, don't be afraid to make the change  
Hey, you know that things can't stay the same  
Hey, don't be afraid to make the change

As much as we'd like things to always stay the same  
There comes a time in everyone's life when we feel  
strange  
Doing the same old things again the same way  
We've gotta break away to something new, we'll do it  
someday

Hey, you know that things can't stay the same  
Hey, don't be afraid to make the change  
Hey, you know that things can't stay the same  
Hey, don't be afraid to make the change

As time goes on everyone and everything changes  
As time goes on everyone and everything changes

Hey, you know that things can't stay the same  
Hey, don't be afraid to make the change  
Hey, you know that things can't stay the same  
Hey, don't be afraid to make the change

Hey, you know that things can't stay the same  
Hey, don't be afraid to make the change  
Hey, you know that things can't stay the same  
Hey, don't be afraid to make the change
