"How I Remember You"

Visit "[How I Remember You](#)" on MotoLyrics.com

Every afternoon, I go inside these bitter walls
And I'll open up your eyelids to uncover what went
wrong
I know it's true what they say, you can't get hurt
everyday
When it all comes around in a circle

Last night, while you were sleeping, I'd never noticed
this before
How I even want you more when you are right here
In time I hope you will find out that everything that I
have said
Was in your best interest instead
Of what I wanted out of you, it's not my fault

I've never been so in love with you
I've never been one to tell the truth
I've never felt so alive

'Cause I wanna know, why it feels this way inside me
How it feels when you're around me
I wanna know what's going on
Promise me

Trapped inside this room and all I have left is to say
If you want this, come and get this and I won't stand in
your way
I know it's true what they say, you cant get hurt
everyday
When it all comes around in a circle

Last night, while you were sleeping, I'd never noticed
this before
How I even want you more when you are right here
In time I hope you will find out that everything that I
have said
Was in your best interest instead
Of what I wanted out of you, it's not my fault

I've never been so in love with you
I've never been one to tell the truth
I've never felt so alive

'Cause I wanna know, why it feels this way inside me
How it feels when you're around me
I wanna know what's going on

'Cause I wanna be with you, be with you
Be with you, be with you
'Cause I wanna leave with you, leave with you
Leave with you, leave with you
So come on and tell me right now if you're into me
'Cause I wanna be with you

Promise me
Promise me

Promise me your words mean something
So this won't add up to nothing
Promise me your words mean something
So this won't add up to nothing
