"I Love You"

Visit "[I Love You](#)" on MotoLyrics.com

Well he searched and searched for nights and days
Till he found the one he loved
And he wrapped her in his arms again
And he thanked the stars above
Then he found who he'd been looking for
And he stared into her eyes

He said "I love you"
Yes I do
He said "I love you"

She stared him right back in the eyes
With a look of disbelief
Then she gazed off into somewhere else
Was it real or just a dream
And she pulled him oh so close to her
And she whispered in his ear

She said "I love you"
Yes I do
She said "I love you too"

So together they will always be
Until the stars fall from the sky
So if you find someone you love you must never let
them go
Hold them tight with all your might
And say three little words

You say "I love you"
You say "I love you"
