Scared and lonely
Going out for the night
Shaking all over
And wishing I'd never come here
He pulled up in a cloud of smoke
So much was said
But nobody spoke a word
So I took a chance
And he followed me home
I knew he wouldn't beg
So I gave in without fighting
Been so long since I've been this way
Since I loved this way
So I asked him if he would stay for a while

Chorus
Lucky comes easy
Lucky's not shy
And if you're lucky
You'll go for a ride
For a ride

We talked a while
And he told me his life
We laughed and we cried and
I knew that I could love him
He got up to say good by
I said where you going,
He said that he must leave

Repeat Chorus

Lucky takes you out for a ride
For a ride (twice)

Repeat chorus (twice)
