### "Night & Day"

Visit "[Night & Day](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Night and day the winds hold away  
In the upper atmosphere  
And down this way the children play  
With their warmed up plastic spears  
And the cars drive by  
And the flower dies  
And the traffic flows  
And the flower grows.  
You walk into the room  
You're bound to find me there  
You hand me the wooden spoon  
The sun shines through your hair  
But please, please, leave me  
Until ten to four  
'Cos I'm piecing togheter the night before  
So you call me on the phone  
So I feel I'm not alone  
And you mention Ho Chi Minn  
While I try to remember where I've been  
But the TV goes on and on and on  
But the aerial's fucked  
So the picture is wrong  
And the whole of this is only a song  
The whole of this is only a song  
The cars drive by,  
And the flower dies  
And the traffic flows,  
And the flower grows,  
Night and Day, Night and Day,  
It, s just Night and Day
