I had never thought  
we were hangin' on  
but the fall looks very far  
staring at the ground  
what flesh wil do to you  
will do to me too  
Be free and on your own  
It's not that simple, it's not that simple  
It's never that simple  
It feels like the first time  
that we'd fallen behind and  
we faltered too far down  
no one could save us  
It feels like the first time  
and we're standing above them  
and no one can touch us  
the worst is over  
the worst is over  
I could say to you  
a bitter word or two  
There's no stopping now

Just get it out in the air  
Heard it through the fog  
and hurt by it all  
I'd take it back today  
but it's out of my hands, it's out of my hand  
But it's out of my hands  
It feels like the first time  
that we'd fallen behind and  
we faltered too far down  
no one could save us  
It feels like the first time  
and we're standing above them  
and no one can touch us  
the worst is over  
Lost in the film again  
All the signs were showing  
watching a single frame when the wind begins  
You're never anywhere  
Cause you're caught in my weather  
Caught in my weather every time  
Feels like the first time  
We'd fallen behind  
No use is the other one to wait  
But I can hold on  
as sure as I'm strong

Get over the faithfull yesterdays...

yeah... days..... yeah.....

It feels like the first time

that we'd fallen behind and

we faltered too far down

no one could save us

It feels like the first time

and we're standing above them

and no one can touch us

the worst is over

It feels like the first time

that we'd fallen behind and

we faltered too far down

no one could save us

It feels like the first time

and we're standing above them

and no one can touch us

the worst is over

the worst is over

the worst is over
