I won't forget you, I'll miss you more all the time  
But I need you let you, know that apart you're still mine,  
because

With everything I ever have, everything I'll learn on the  
way,  
I'll wipe your tears away  
Everything I ever have, everything you'll ever need  
Everything you want me to stay  
You'll still be mine today I'll wipe your tears away

Chorus:  
Crying now, won't drown the love out  
I'll wipe your tears away  
You and I don't need a goodbye  
Don't hide  
I'm here tonight so baby don't cry

There's no tomorrow, without you I don't feel the  
dance  
But I need to follow, my own feet to give us a chance,  
because

All the dreams I ever have, everything I long for today  
Might take me far away  
All the dreams I ever have, it's not as if I wanna leave  
When every last look that you take  
Just makes me want to stay please wipe your tears  
away

Chorus

It's cold and it's lonely tonight

Because everything I ever have, Everything I'll learn on  
the way  
I'll wipe your tears away

Chorus(Ã—2)
